Awards

LED Profilelement GmbH is an absolute specialist in the development and production of LED drywalling and plaster profiles and has won several prizes for innovation, technology and design.

- IENA 2011 International Trade Fair for Inventions - Gold medal for the invention of flush-mount profiles, innovation in interior building
- IENA 2011 Chamber of Crafts Middle Franconia - special prize awarded by the Chamber of Crafts for the invention of flush-mount profiles, innovation in drywalling, drywall coving
- Grand prize of the free state of Bavaria 2012 - Outstanding technological achievements in the trade
- AIT Innovation Award 2012 - Product of high architectonic quality
- Querdenker Award 2012 - (Lateral Thinker Award) - Winner in the category: start-up
- Iconic Award 2013 - Produkt Winner
- Rigips Trophy 2013/2014 - Nominee
- Architects Choice Awards 2015 - Winner of the Best Interior Building product Präsentiert bei "Wink Lighting in Irland"

Profiles

and Accessories

LED-Profilelement stands for elegant and energy-saving wall, cielling, floor and furniture illumination

- LED Profiles for the installation of LED sticks or LED strips

- Fast and easy application in drywall, wet plaster and funiture projects

- The most innovative solution for indirect lighting

Terms of delivery for Germany:

Parcel delivery charges 201 x 17 x 25 cm / up to 30 kg within Germany: € 10.00
Overseas, bulk freight and costs on request

Terms of payment:

Delivery against advanced payment with 2% cash discount
Goods dispatched immediately on reciept of payment

Our General Terms and Conditions apply to all deliveries and services
(see www.ledprofilelement.de)

Installation videos and instructions are available an www.ledprofilelement.de

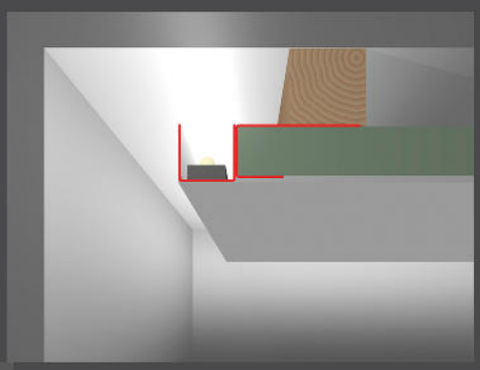
Scope:
Orders and deliveries within Germany and overseas

LED Profilelement GmbH / Industriestraße 4 / 92360 Mühlhausen / Tel: + 49 /(0)9185 903634 / Fax: + 49 /(0)9185 903635
info@ledprofilelement.de / www.ledprofilelement.de

DSL

LED Drywall Profile for suspended (floating) ceiling with supporting structure

Slim, delicate appearance, only 15mm upstand

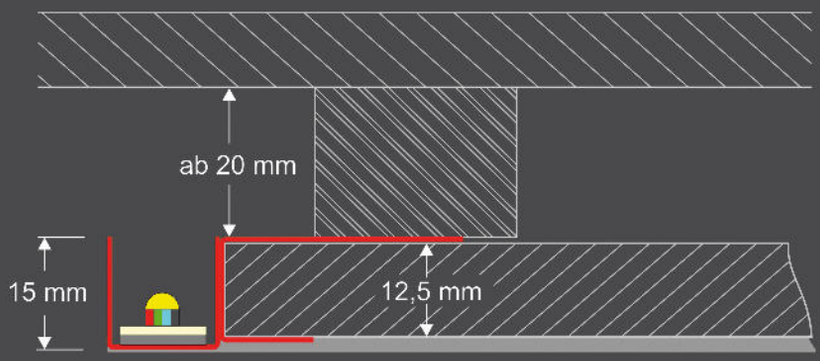


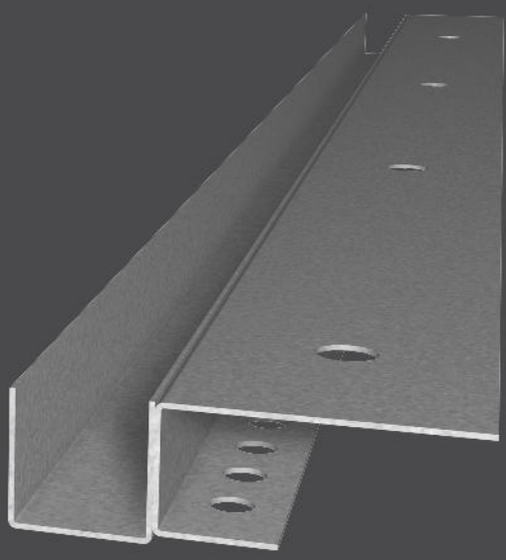
Highlights:

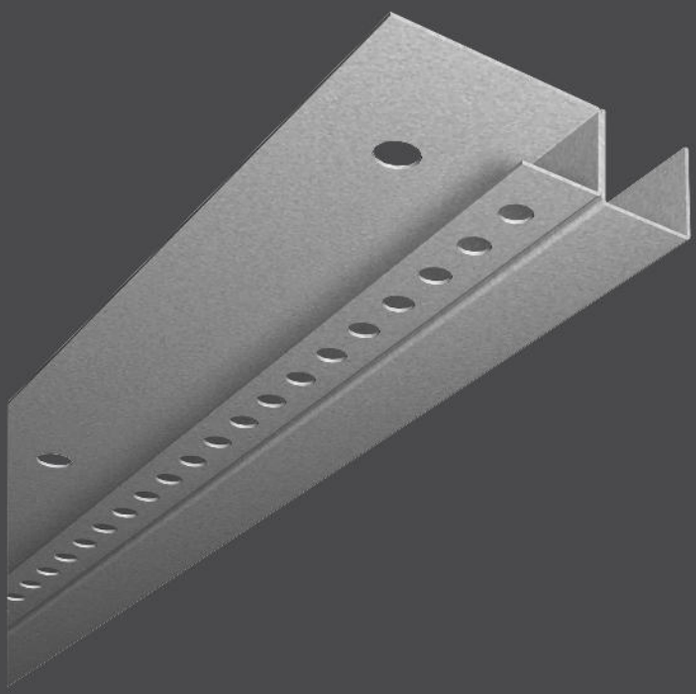
- Suspension height fromm 20 mm
- Substructure of C-channels or wood
- Quick and easy finish
- Easy removal of the LED strips when using magnetic tape
- Various lighting possibilities by inserting the LED strips in different ways

LED Profilelement GmbH / Industriestraße 4 / 92360 Mühlhausen / Tel: + 49 /(0)9185 903634 / Fax: + 49 /(0)9185 903635
info@ledprofilelement.de / www.ledprofilelement.de

DSL







Art.No.	Description
	Zinc sheet profile STA 1203 NA/ t= 0,63
PE10.0001	DSL / 12,5 / 2,0 m / approx. 935 g / incl. Primer

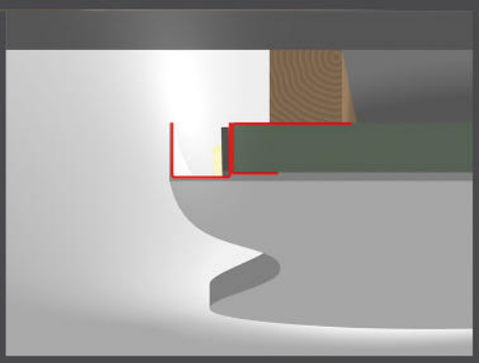
DSL Flex

LED drywall profile for suspended (floating) curved surfaces

Universal flexible finishing profile / individual shapes



Highlights:

- Suspension height from 20 mm
- Substructure of C-channels or wood
- Individual shaping to fulfill your own wishes and neede
- Easy removal of the LED strips when using magnetic tape
- Various lighting possibilities by inserting the LED strips in different ways

SNL

LEDdrywall profile with visible wing for direct connecting to building elements

Universal connection profile for walls, ceilings and floors

Highlights:

- Connecting/visible wing with visible width of 20 to 80 mm
- Minimum wall/ceiling build up for indirect illumination
- Substructure of C-channels or wood, easy installation even without substructure
- Further design options by positioning 2 profiles opposite one another
- Concealed installation of LEDs is possible by inserting diffusor/cover profiles (see accessories)
- Easy removal of the LED strips when using magnetic tape
- Various lighting possibilities by inserting the LED strips in different ways

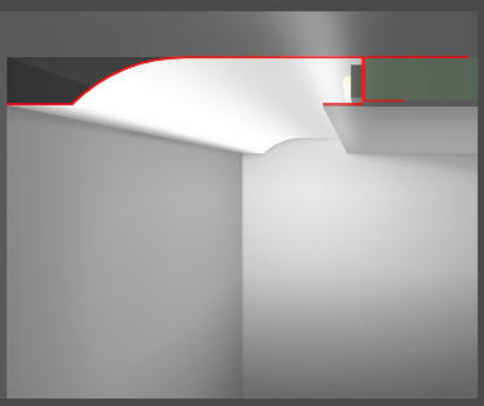
R10-R

LEDdrywall profile with visible wing for direct connecting to building elements

Universal connection profile for walls, ceilings and floors



Besonderheiten:

- Easy to fit with or without substructure
- Substructure of C-channels or wood
- Concealed installation of LEDs is possible by inserting diffusor/cover profiles (see accessories)
- The curve in the profile gives the indirect lighting a calm and flowing touch
- Easy removal of the LED strips when using magnetic tape
- Various lighting possibilities by inserting the LED strips in different ways

LED Profilelement GmbH / Industriestraße 4 / 92360 Mühlhausen / Tel: + 49 /(0)9185 903634 / Fax: + 49 /(0)9185 903635

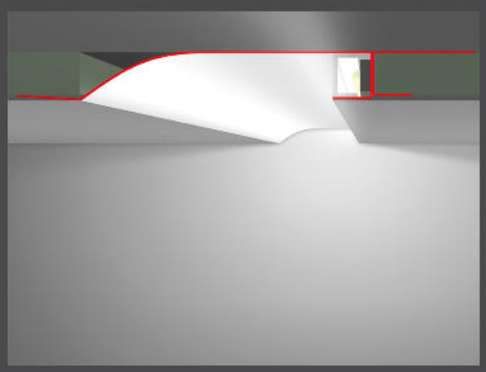
R10-F

LED drywall profile with visible reflector wing for fitting in the surface

The profile for light strips in the surface



Highlights:

- Easy mounting with no visible edges
- Substructure of C-channels or wood or, be it the case, in wall
- Concealed installation of LEDs is possible by inserting diffusor/cover profiles (see accessories)
- The curve in the profile gives the indirect lighting a calm and flowing touch
- Easy removal of the LED strips when using magnetic tape
- Various lighting possibilities by inserting the LED strips in different ways

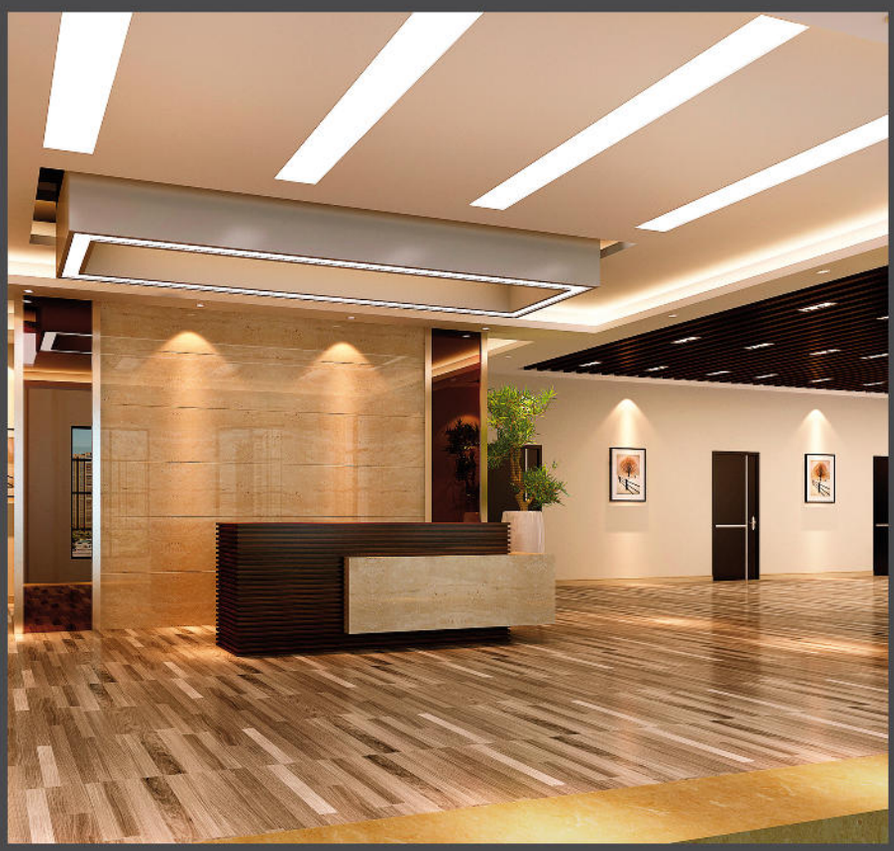
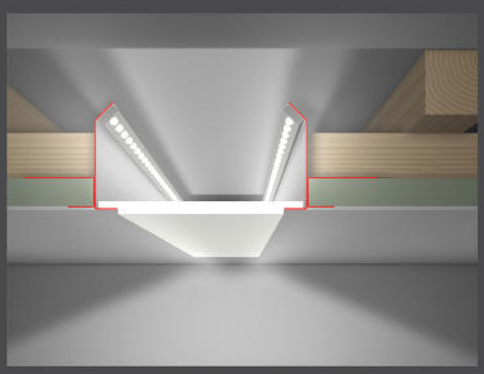
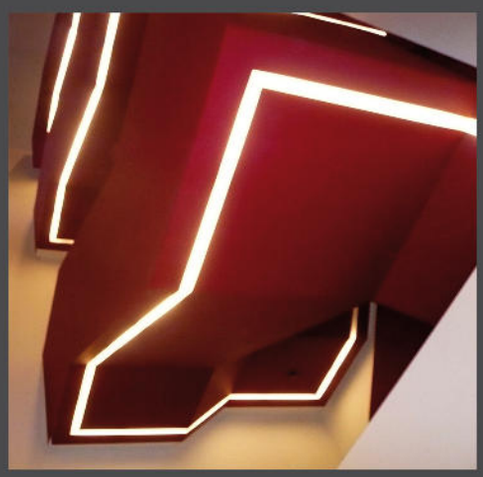
ADD

Flush mounted drywall profile for LED and conventional luminaries







Highlights:

- Profile for light strips/light zones for LED or conventional luminaires
- Easy mounting with no visible edges
- Substructure of C-channels or wood
- Installation depth of 40/80mm
- The distance between the profiles depends on the width of the diffusor/cover, either 80 or 120mm visible width
- Different transmittance and flow of illumination depending on diffusor/cover material

LED Profilelement GmbH / Industriestraße 4 / 92360 Mühlhausen / Tel: + 49 /(0)9185 903634 / Fax: + 49 /(0)9185 903635

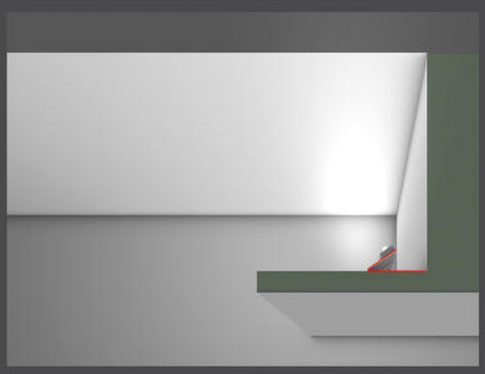
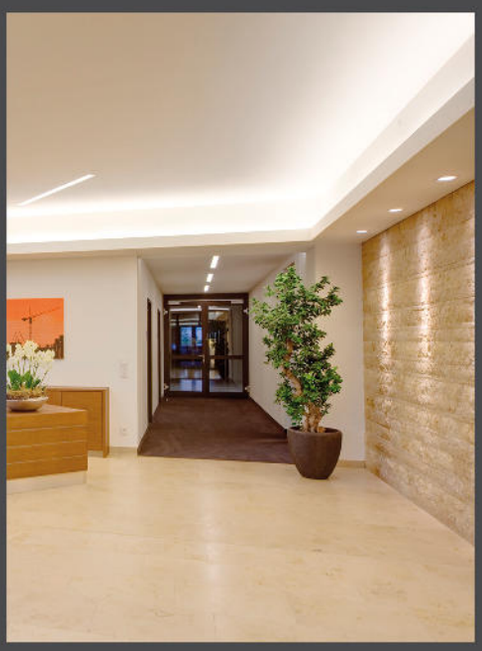
AWP

Drywall profile for the installation of LED strips in existing lighting coves or upstands





Highlights:

- Easy and quick upgrading of plaster mouldings
- Magnetic tape enables easy adjustment of the LED strips to ensure optimum illumination
- Space for laying cables behind the AWP-Profile
- Also for use as a flexible profile for curves
- Various lighting possibilities by inserting the angle in different ways

LED Profilelement GmbH / Industriestraße 4 / 92360 Mühlhausen / Tel: + 49 /(0)9185 903634 / Fax: + 49 /(0)9185 903635

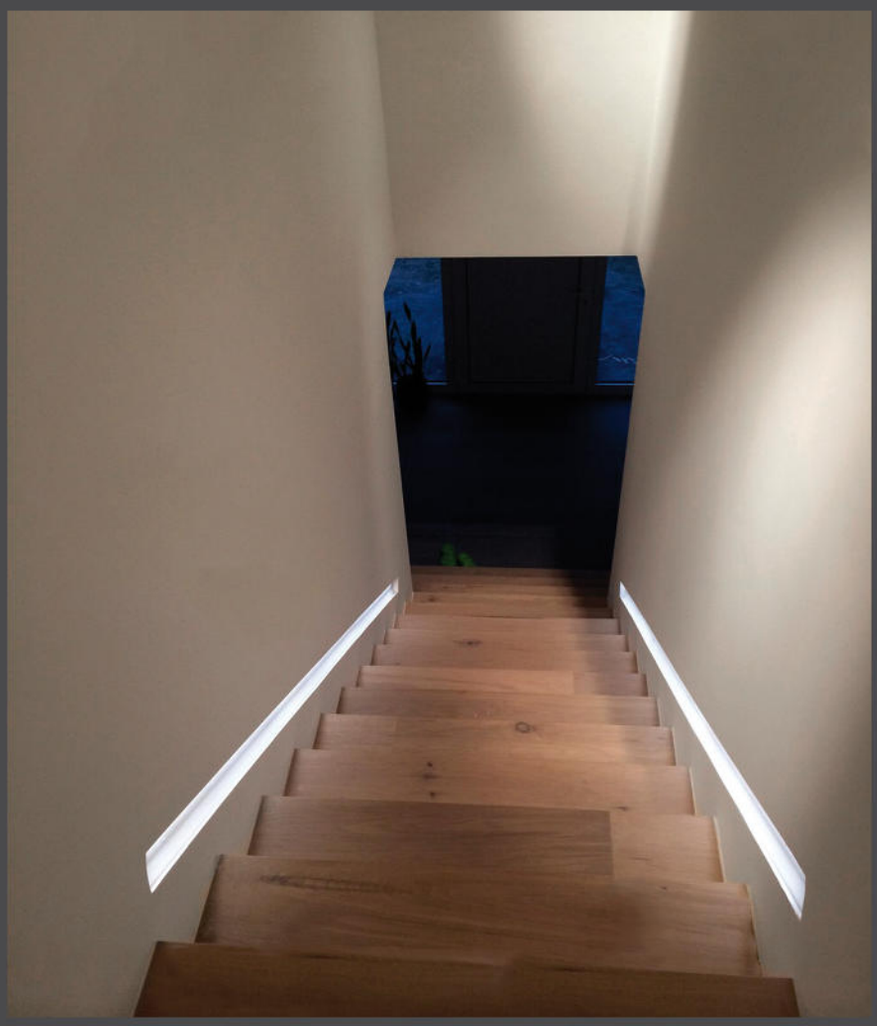
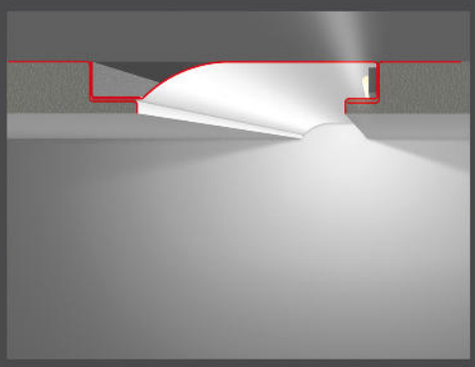
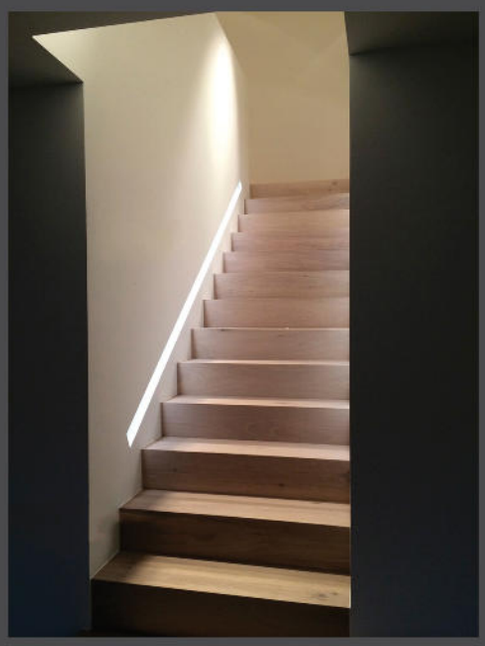
R10-F Plaster profile

LED plaster profile with reflector wing for installation in the surface

The profile for light strips in the surface







Highlights:

- Mounting to brickwork by way of adhesive or anchor fitting
- With peel bar for flush plastering, minimum plaster thickness 19mm
- Concealed installation of LEDs is possible by inserting diffusor/cover profiles (see accessories)
- The curve in the profile gives the indirect lighting a calm and flowing touch
- Easy removal of the LED strips when using magnetic tape
- Various lighting possibilities by inserting the strips in different ways

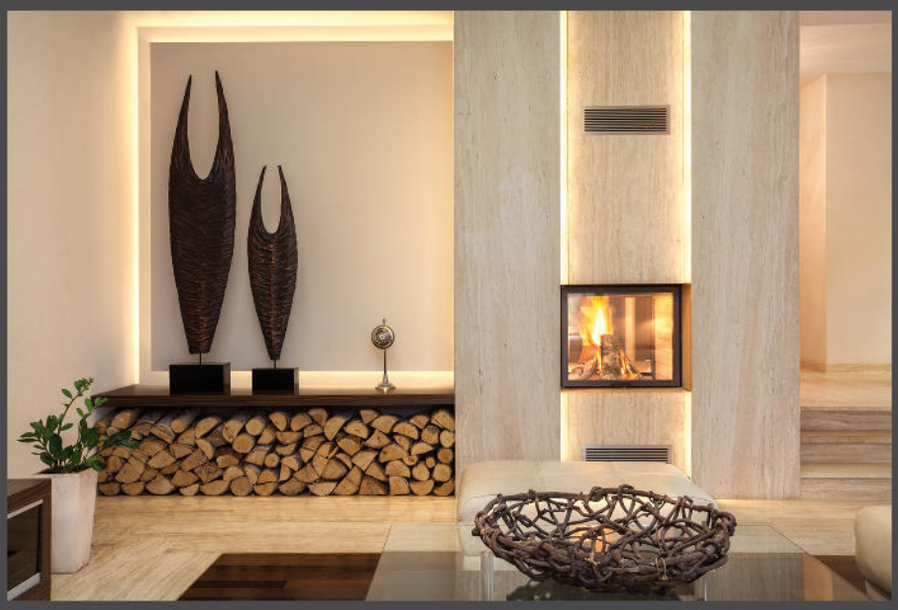
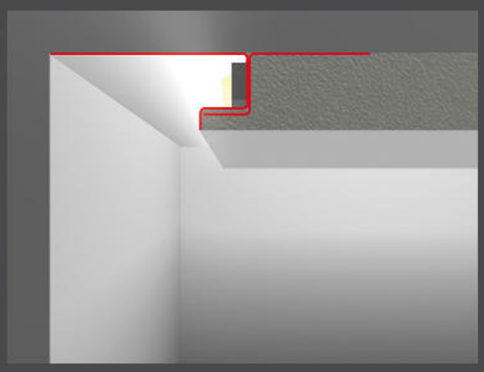
SNL Plaster profile

LED plaster profile with wing for direct connection to building elements





Highlights:

- Universal connection profile for walls, ceilings and floors
- Connecting/visible wing with visible width of 20 to 80 mm
- Mounting to brickwork by way of adhesive or anchor fitting
- With peeling edge for flush plastering, minimum plaster thickness 19mm
- Further design options by positioning 2 profiles opposite one another
- Concealed installation of LEDs is possible by inserting diffusor/cover profiles (see accessories)
- Easy removal of the LED strips when using magnetic tape
- Various lighting possibilities by inserting the strips in different ways

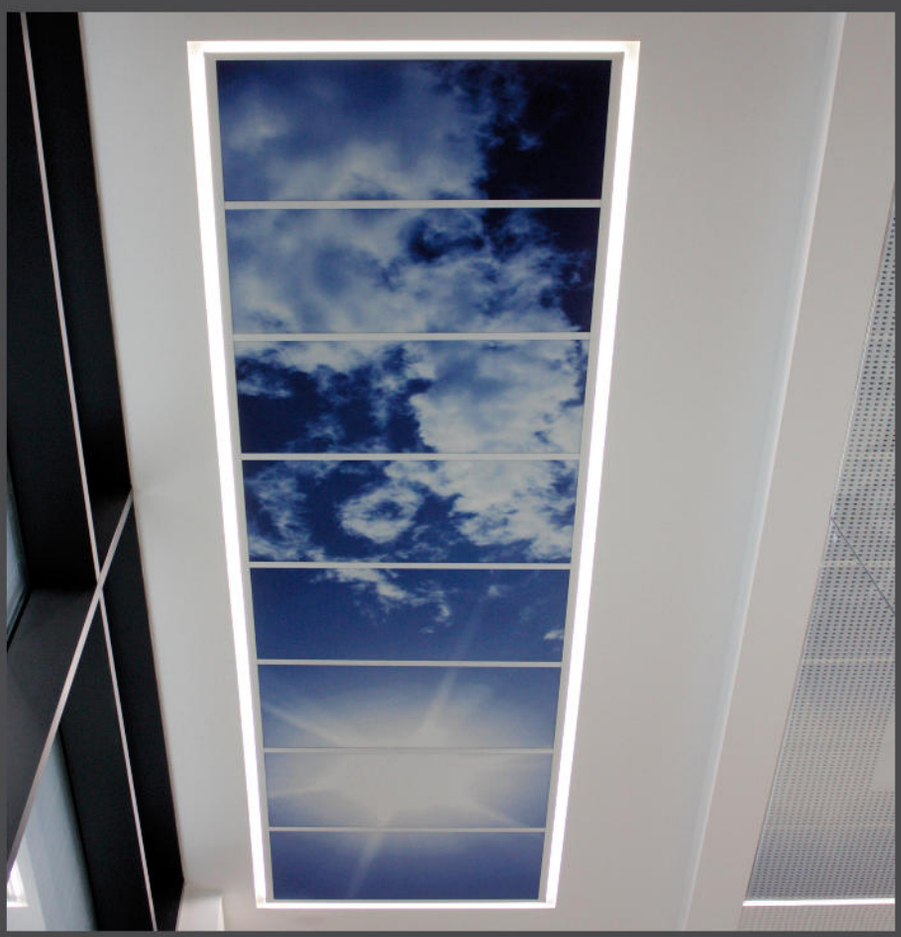
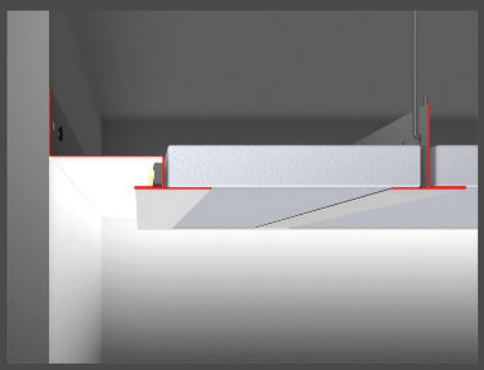
WRD-40 / TRD-35

WRD-Wall angle grid ceiling - support and edging profile for grid, coffered and plaster ceilings

TRD-girder profile for grid ceiling - support plating for grid, coffered and plaster ceilings





Highlights:

- Wall angle 40mm visible wing
- For LED strips up to 15mm wide
- Quick and easy installation
- New appearance
- Mitre cut cover (accessories)
- Concealed installation of LEDs is possible by inserting diffusor/cover profiles (see accessories)
- Easy removal of the LED strips when using magnetic tape

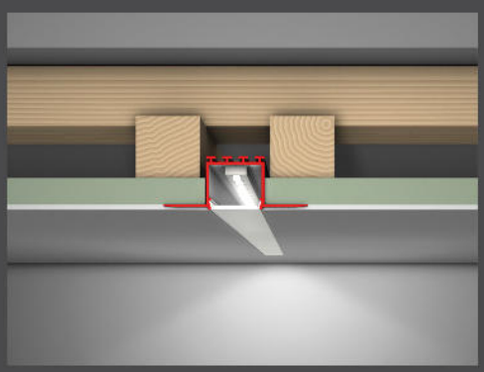
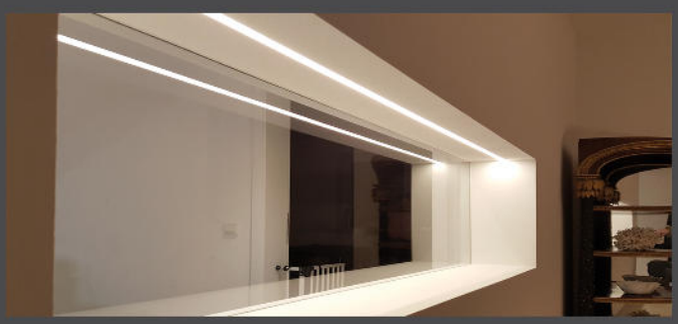
L 24

Linear aluminium profile for concealed installation in wall and ceiling surfaces



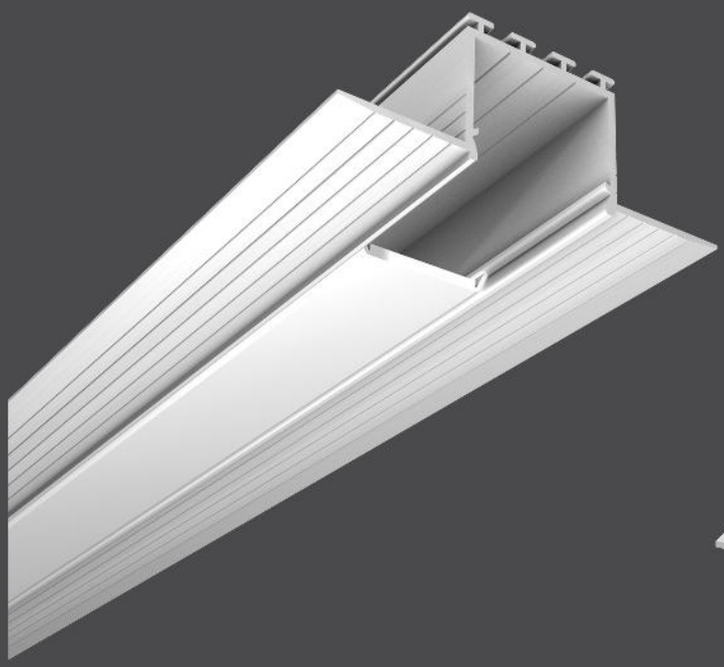


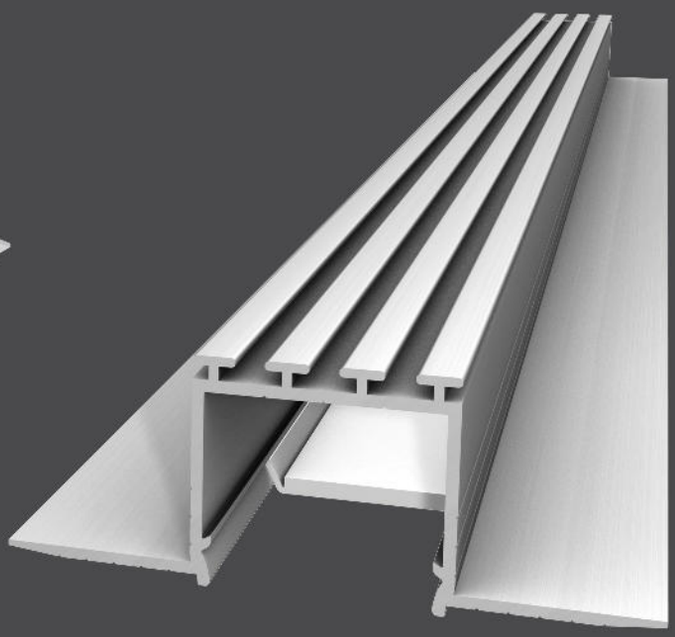
Highlights:

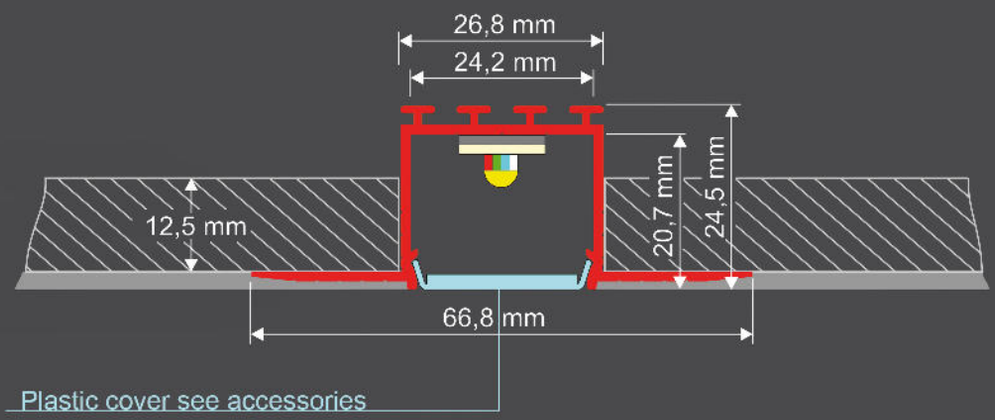
- For light slots in ceilings and walls, can be filled to create a smooth finish with adjacent surfaces
- A maximum of 2 LED strips of 8-10mm can be fitted
- The possibility of installing 2 LED strips in the profile means that it can be used as a primary, energy-efficient source of light
- If the distance between the LED chips <15mm a homogeneous illuminated line is formed
- The satin-finished cover (accessories) is weather and UV resistant
- The end caps (accessories) finish off the profile

LED Profilelement GmbH / Industriestraße 4 / 92360 Mühlhausen / Tel: + 49 /(0)9185 903634 / Fax: + 49 /(0)9185 903635
info@ledprofilelement.de / www.ledprofilelement.de

L 24







Art.No.	Description	
	Aluminium profile, not anodized	Plastic end caps
PE85.0003	L 24 Alu-Profile / 2,0 m / approx. 890 g	PE85.0005 Grey

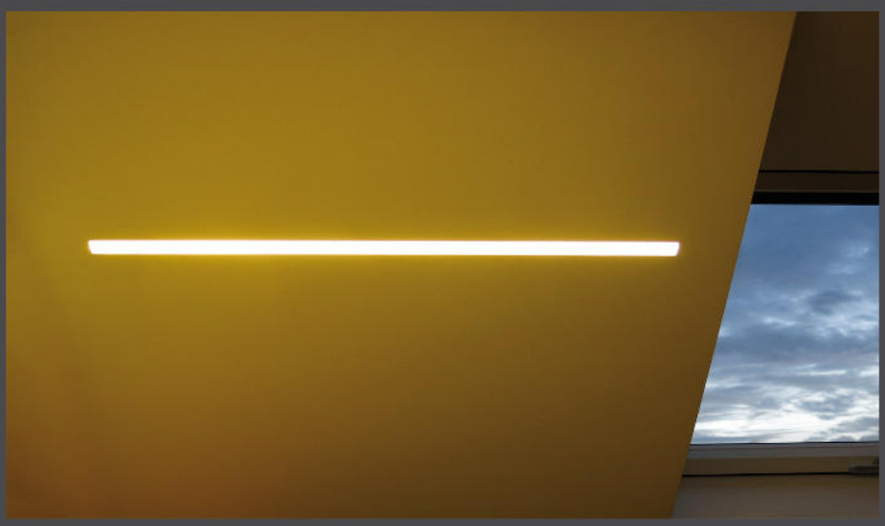
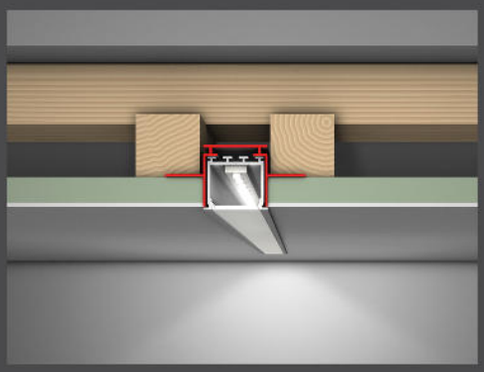
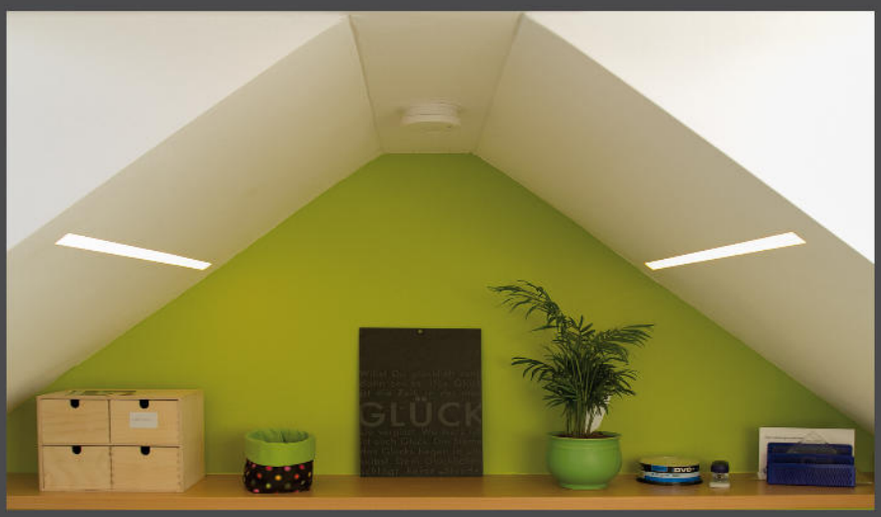
info@ledprofilelement.de / www.ledprofilelement.de

M 28

M28 linear aluminium profile for the construction of narrow light slots in plasterboard walls and ceilings







Highlights:

- Easy installation
- Installed simultaneously with the plasterboard construction
- Can be complemented by the M24 aluminium profile
- Wooden ceilings or wall panelling can be used instead of plasterboard

LED Profilelement GmbH / Industriestraße 4 / 92360 Mühlhausen / Tel: + 49 /(0)9185 903634 / Fax: + 49 /(0)9185 903635

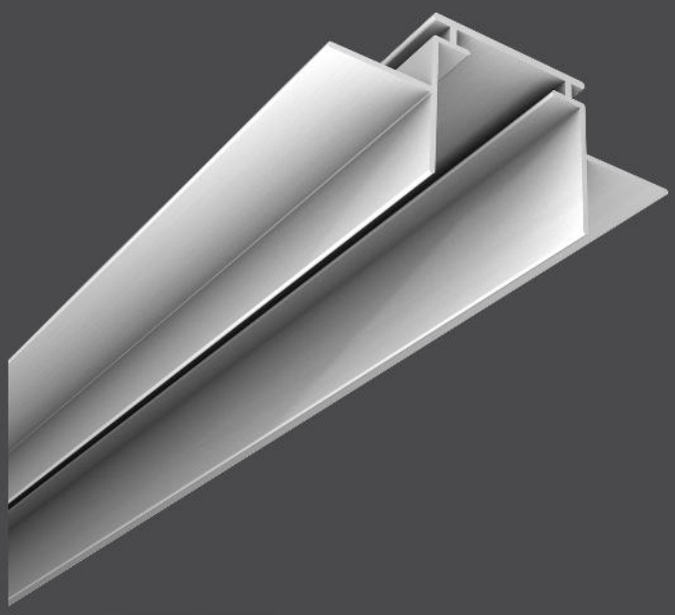
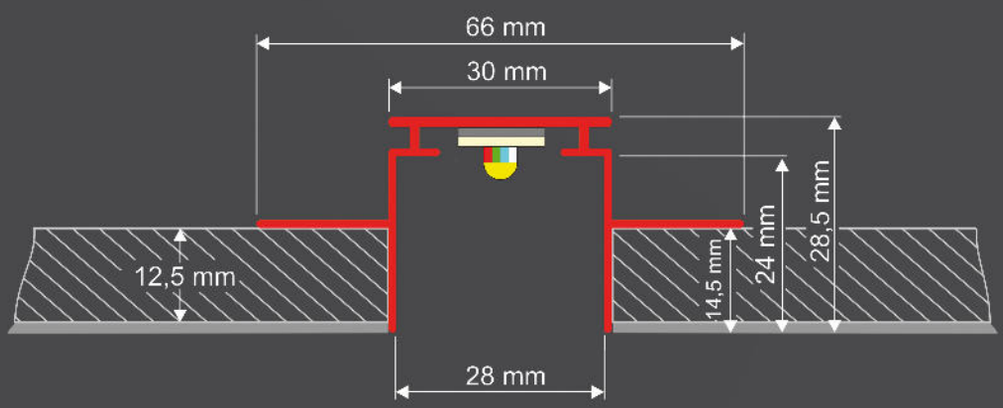
M 28



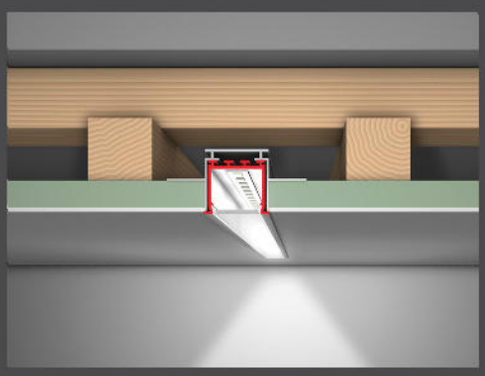


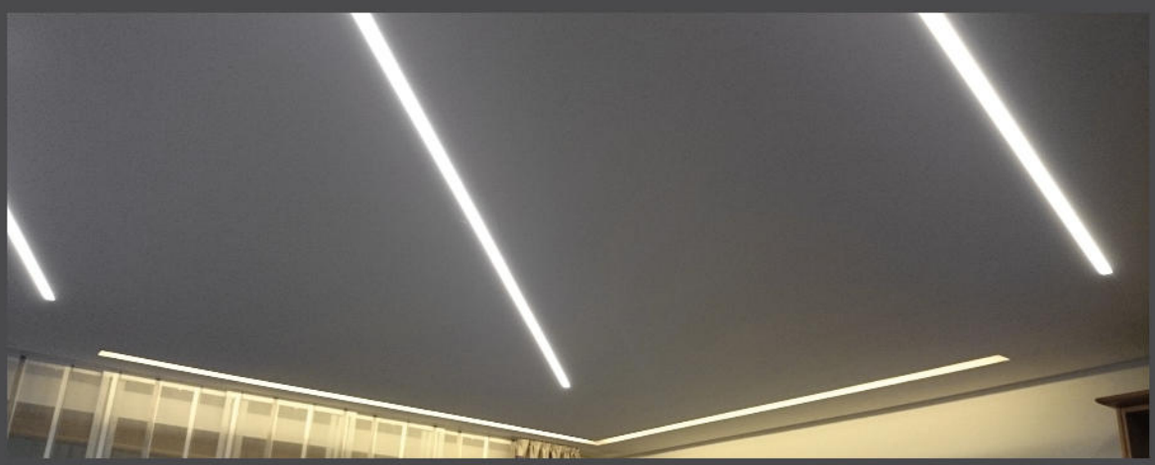
Art.No.	Description
	Aluminium profile, not anodized
PE85.0015	M 28 Alu-Profil / 2,0 m / approx. 890 g

LED Profilelement GmbH / Industriestraße 4 / 92360 Mühlhausen / Tel: + 49 /(0)9185 903634 / Fax: + 49 /(0)9185 903635
info@ledprofilelement.de / www.ledprofilelement.de

M 24

M24 linear aluminium profile for the construction of narrow light slots in plasterboard walls and ceilings in combination with the M28 profile



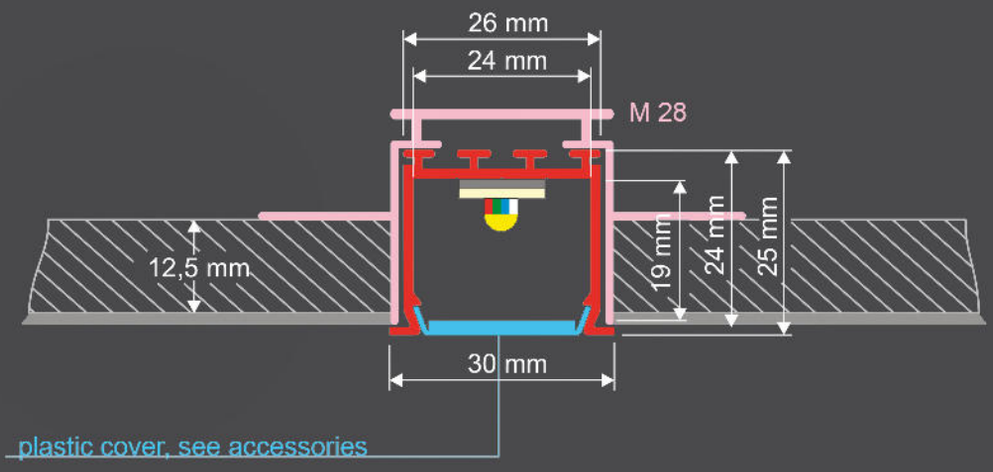


Highlights:

- One or two LED strips with a maximum width of 10mm can be inserted
- The LED strips can be fixed to the aluminium profile M28 using magnetic tape PE10.2105 and Ferro foil PE10.2120
- Flush mount lighting in wall or ceiling

LED Profilelement GmbH / Industriestraße 4 / 92360 Mühlhausen / Tel: + 49 /(0)9185 903634 / Fax: + 49 /(0)9185 903635
info@ledprofilelement.de / www.ledprofilelement.de

M 24



Art.No.	Description	
	Aluminium profile, anodized	Plastic end caps

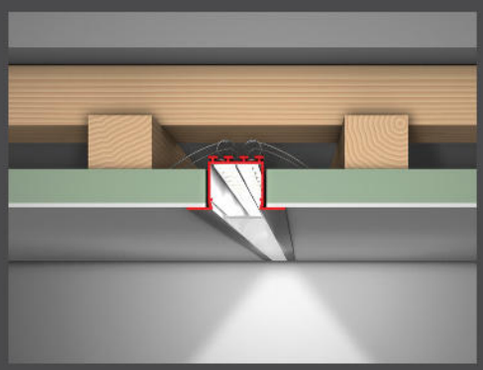
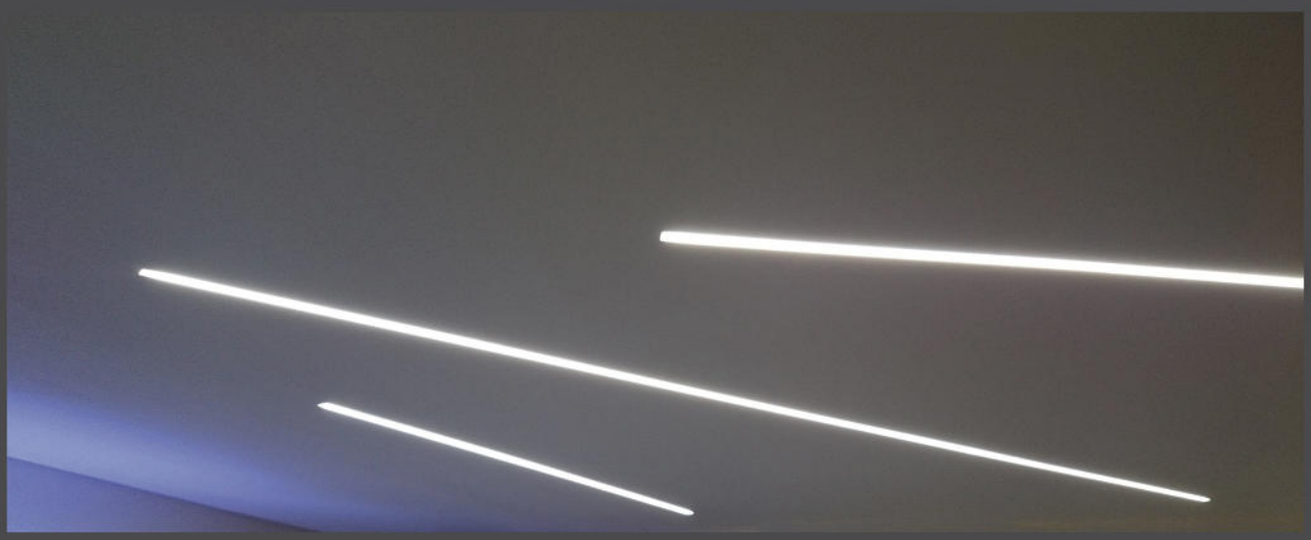
info@ledprofilelement.de / www.ledprofilelement.de

S 24

S24 linear aluminium profile for the construction of narrow light slots in plasterboard walls and ceilings





Highlights:

- Also suitable for wooden ceilings and wall panels
- One or two LED strips with a maximum width of 10mm can be inserted
- This creates a luminaire which protrudes only minimally out of the wall or ceiling

LED Profilelement GmbH / Industriestraße 4 / 92360 Mühlhausen / Tel: + 49 /(0)9185 903634 / Fax: + 49 /(0)9185 903635

info@ledprofilelement.de / www.ledprofilelement.de

AU-Flat

Flat U-profile for 10 to 11.3 mm LED strips

Especially suitable for furniture/kitchen construction

Highlights:

- Flush mounting possible in wooden or laminate surfaces
- Small dimensions
- High-quality modern and timeless design
- Homogeneous light effect, non-dazzle light thanks to suitable covers (accessories)
- Available in: anodized aluminium, matt-black or matt-white

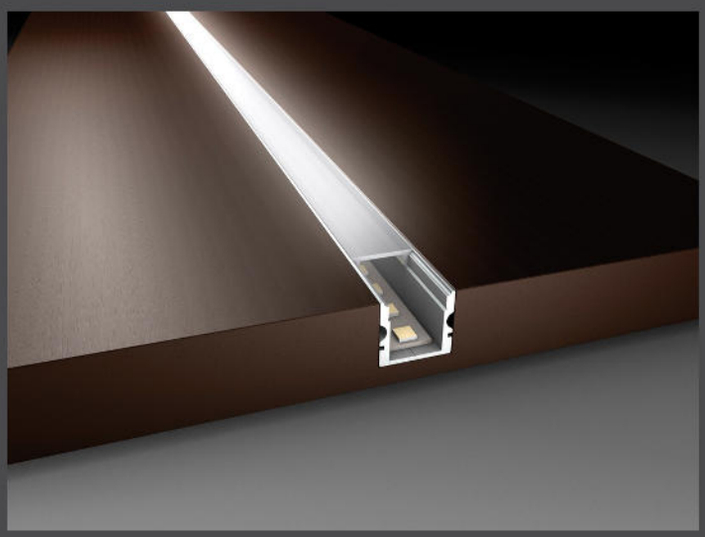
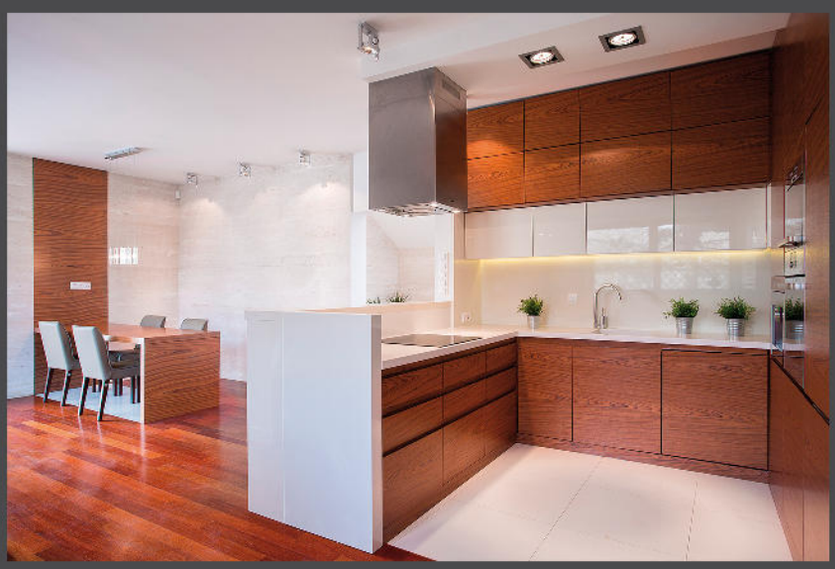
AU-High

High U-profile for 10 to 11.4 mm LED strips

Especially suitable for furniture/kitchen construction





Highlights:

- Flush mounting possible in wooden or laminate surfaces
- Small dimensions
- High-quality modern and timeless design
- Homogeneous light effect, non-dazzle light thanks to suitable covers (accessories)
- Available in: anodized aluminium, matt-black or matt-white

LED Profilelement GmbH / Industriestraße 4 / 92360 Mühlhausen / Tel: + 49 /(0)9185 903634 / Fax: + 49 /(0)9185 903635

info@ledprofilelement.de / www.ledprofilelement.de

ET-Flat

Flat U-profile with collar for 10 to 11.3 mm LED strips

Especially suitable for furniture/kitchen construction

Highlights:

- Flush mounting possible in wooden or laminate surfaces
- Small dimensions
- High-quality modern and timeless design
- Homogeneous light effect, non-dazzle light thanks to suitable covers (accessories)
- Available in: anodized aluminium, matt-black or matt-white

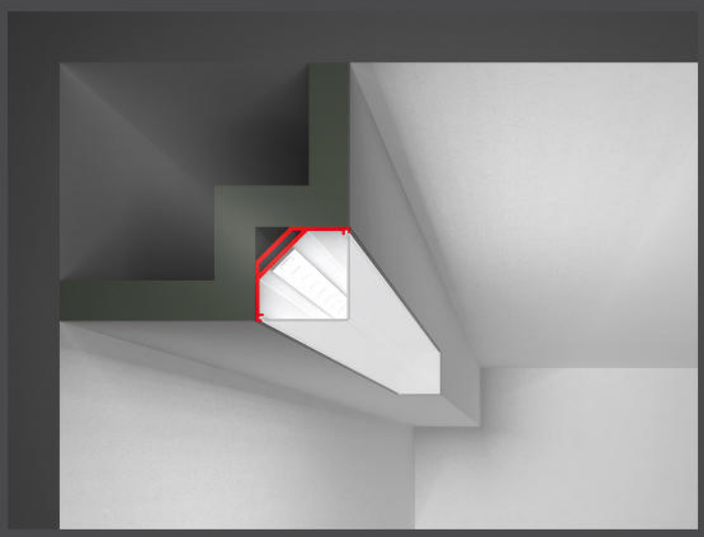
E 45

Corner Profile

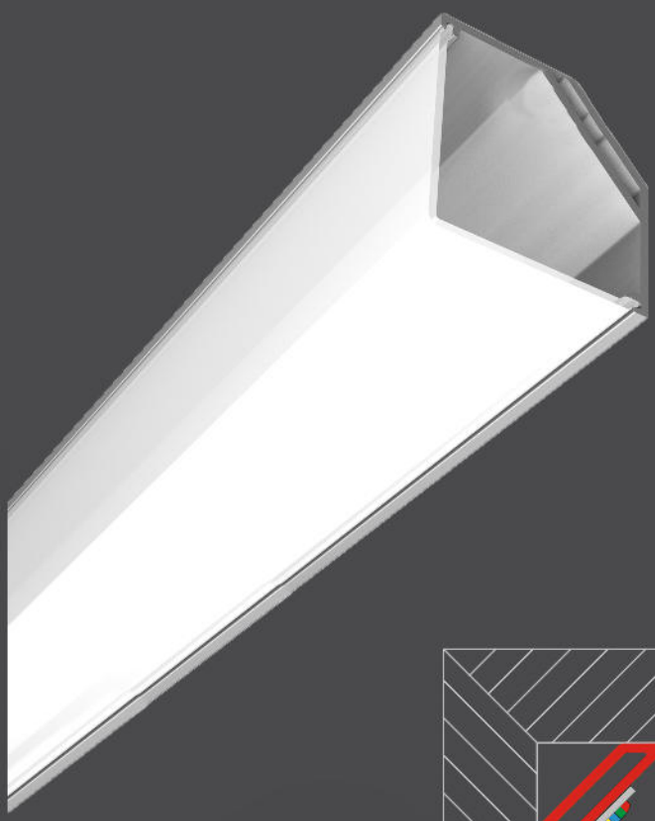


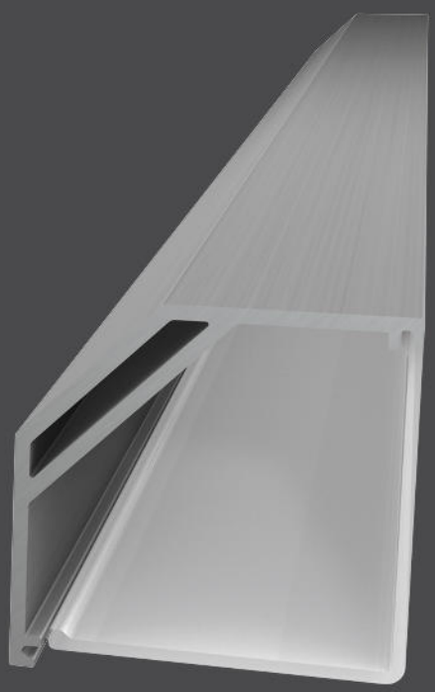
Highlights:

- Ideal for plaster mouldings as flush-mounted outside corner solution
- Small dimensions
- High-quality, modern and timeless design
- Homogeneous light effect, non-dazzle light thanks to compatible covers (accessories)
- The possibility to install 2 LED strips in the profile means that it can be used as a primary, energy-efficient source of light

LED Profilelement GmbH / Industriestraße 4 / 92360 Mühlhausen / Tel: + 49 /(0)9185 903634 / Fax: + 49 /(0)9185 903635
info@ledprofilelement.de / www.ledprofilelement.de

E 45



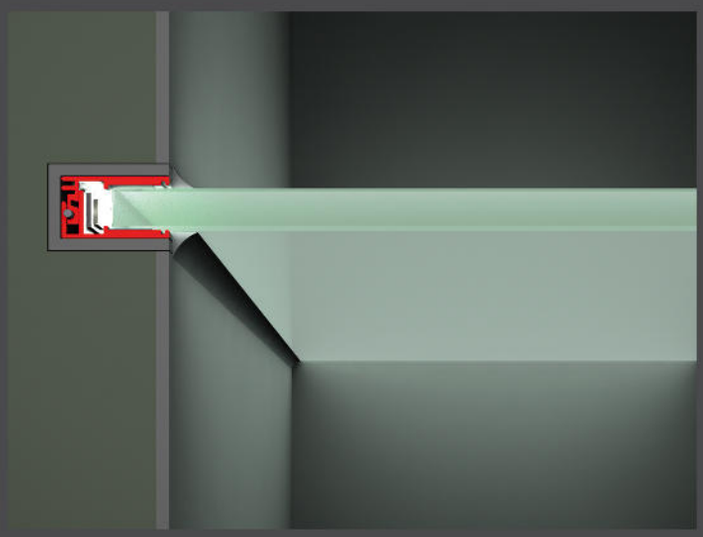


Art.No.	Description
	Aluminium profile, anodized
PE85.0020	E 45 Alu-Profile / 2,0 m / alum anodized / approx. 600 g
PE85.0021	Cover satin-finished
PE85.0023	End cap

LED Profilelement GmbH / Industriestraße 4 / 92360 Mühlhausen / Tel: + 49 /(0)9185 903634 / Fax: + 49 /(0)9185 903635
info@ledprofilelement.de / www.ledprofilelement.de

GEP 810

Holding profile for sheets of glass

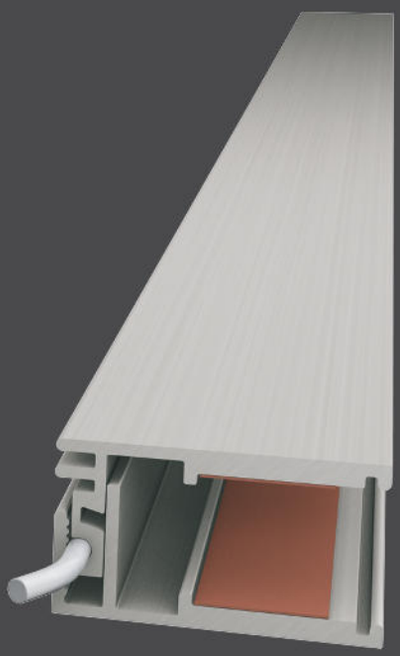


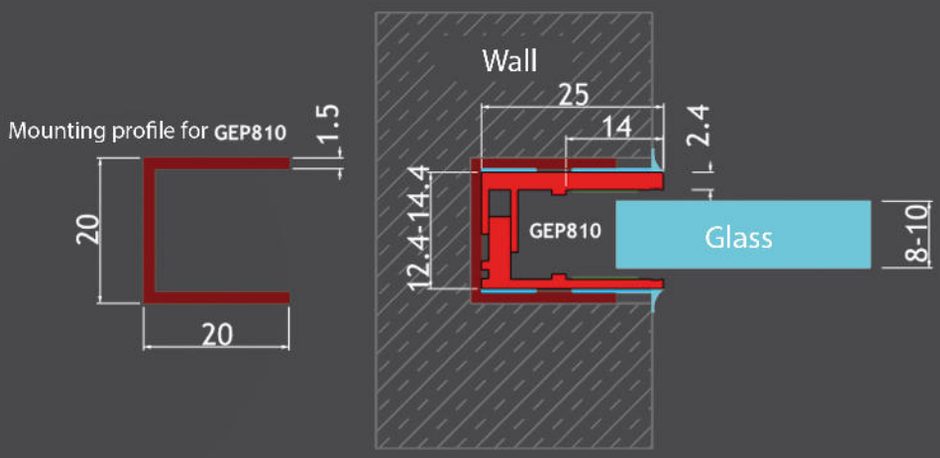
Highlights:

- Split into two parts which facilitates installation of LED strips
- Different laser strengths lend the glass a, to a greater and lesser extent, structured visible surface which can barely be made out when the lights are off
- Whole range of light colours possible (RGBW strip)
- Use as indirect lighting, in furniture design or as a partition
- Free selection of motifs
- Homogeneous illumination of the glass surface

LED Profilelement GmbH / Industriestraße 4 / 92360 Mühlhausen / Tel: + 49 /(0)9185 903634 / Fax: + 49 /(0)9185 903635
info@ledprofilelement.de / www.ledprofilelement.de

GEP 810





Art.No.	Description
	Aluminium profile, anodized
PE89.0550	GEP 810 Alu-Profile / 2,0 m / Alum. anodized / approx. 600 g
PE89.0552	Alum mounting profile for GEP 810 / 2,0 m / approx. 600 g
PE89.0051	End cap

LED Profilelement GmbH / Industriestraße 4 / 92360 Mühlhausen / Tel: + 49 /(0)9185 903634 / Fax: + 49 /(0)9185 903635

Accessories

Cover suitable for SNL, R10-R, R10-F, SNL plaster and R10-F plaster profiles

Art.No.	Description	
PE10.1000	plastic diffusor cover made of polycarbonate, clear, 12.5 mm, 2.0 m	PE10.1050	plastic diffusor cover made of polycarbonate, satin-finished white, 12.5 mm, 2.0 m	
PE10.1010	plastic diffusor cover made of polycarbonate, opal white, 12.5mm, 2.0m	

Cover suitable for L24, M24 and S24

Art.No.	Description	
PE85.0004	plastic covering made of polycarbonate, satin-finished, 2.0 m	

Cover suitable for AU Flat-High and ET Flat-High

Art.No.	Description	
PE86.0162	plastic covering made of polycarbonate, clear, 2.0 m	
PE86.0163	plastic covering made of polycarbonate, satin-finished, 2.0 m	
PE86.0164	plastic covering made of polycarbonate, opal white, 2.0m

Important details

1) Validity

With the issue of this catalogue, previous versions become invalid.

2)Availability

We are available in person/by telephone:
Monday to Friday from 8.00am to 5.00 pm

3)Returns

To ensure the smooth processing of your return, please note the following points:

All returns must be made via our collection service, without exception.

Please bear in mind that unsolicited returns, i.e. not agreed with us, take much longer to process. For this reason, we charge an additional fee of €10.00 in such cases.

When returning profiles and covers please always use the original packaging as transport packaging.

To prevent damage to the goods during transit, packages and electronic goods must be packed in the original packaging and, if necessary, additional padded packaging.

Damaged goods cannot be accepted.

Please see our General Terms and Conditions at:
www.ledprofilelement.de

4) Order units

Order units are, as a rule, given in pieces, metres, sets, packs, etc. Order units cannot be broken down and the quantity of each item ordered must be divisible by the given order unit.

5) Delivery

Delivery costs of €10.00 per package are charged within Germany.
Special delivery services, international shipment and haulage costs are available on request.

Long goods (profiles) and individually packaged goods (e.g., fleece, magnetic tape, LEDs, etc) are dispatched separately.

Should you wish to exercise you right of return, please contact us without delay via our hotline.

Returns Hotline:
Tel: + 49 /(0)9185/903634
Fax: + 49 / (0)9185/903635

universal environmentally friendly sophisticated

Lightart

This is a new interpretation of indirect lighting with slim and sophisticated profiles allowing to establish a modern formal vocabulary.
Perfectly suiting installations of modern interiors.

The Drywalling innovation in Cove Lighting for "straight forward" integration of light strips in walls, ceilings, and skirtings.

All LED Profiles are prepared for installation of LED Sticks or LED Strips.

LED Illumination

- reduced power consumption (ca. 50% as compared to fluorescent lights)
- long lifetime
- reduced heat dissipation
- maintenance free
- non-attractive for insects
- adjustable light color
- reduced installation depth
- shock proof
- does not contain mercury or other harmful gases
